

Exercises for FFL, Fall 2016, sheet 10

Return Thursday Nov 24, in class.

Exercise 1. Formalize in FOL the following English statements. In each case, declare the type of each signature symbol that you use. Use the strict syntax declared by the definitions in the lecture notes – not using more or less brackets than demanded by those strict syntax rules.

1. When a glass of water is half full, it is also half empty and vice versa.
2. Obama is the President of the United States.
3. Some dogs are stupid.
4. A dog can't be clever and stupid at the same time, but some humans are.
5. A knife lies on my breakfast table.
6. Barber's coffee bar is located at the south corner of the intersection of High Street and Barber's street.

Exercise 2. Consider the following propositions which express that the binary relation R is an equivalence relation:

$$\varphi_1: \forall x Rxx$$

$$\varphi_2: \forall x \forall y (Rxy \rightarrow Ryx)$$

$$\varphi_3: \forall x \forall y \forall z ((Rxy \wedge Ryz) \rightarrow Rxz)$$

Show that none of these propositions is entailed by the others by presenting $\{R\}$ -structures that are models of two of the propositions, but not of the third.
